The North Carolina Center for Nonprofits was founded in October 1990 after years of research pointed to the need for nonprofits to work together to strengthen their organizations and the nonprofit sector. We set our priorities with input from over 2,000 leaders in nonprofits, foundations, and businesses from all 100 NC counties, and seek ongoing input, to continuously evolve and prepare nonprofits and our sector for changes ahead.

I’ve been a member of the Center ever since I started my journey as a young nonprofit executive, and it has remained one of the most important organizations in the sector. My connections, the learning, the connections, the conversations I’ve had as a part of this network — every nonprofit in North Carolina should give serious consideration to joining this network.
